

**10 UNITS**  
**22 WEEKS**

# FRACTION CURRICULUM

 **SPECIAL EDUCATION**

## For students who:

- are emerging or non-readers
- take alternate assessments
- are in special education
- short-attention span
- lack pre-requisite skills
- benefit from the use of pictures for support
- middle/high school

## Why you need this bundle:

- 1
  - If you teach multiple grade levels, you have all you need in one place.
  - Having the same layout for each unit reduces students' anxiety and allows them to focus on the content.
  - Aligned with extended learning standards.
  - Saves you money
  - Picture/visual support for struggling learners

This bundle includes **10 different units** that are typically taught in this order. It includes **22 weeks** of instruction:

1

1. Fraction activities (to review basic fraction units)
2. Adding Fractions using Models (2 weeks)
3. Subtracting Fractions Using Models (2 weeks)
4. Equivalent Fractions (3 weeks)
5. Greatest Common Factor (2 weeks)
6. Least Common Denominator (2 weeks)
7. Adding Fractions (3 weeks)
8. Subtracting Fractions (3 weeks)
9. Multiplying Fractions (2 weeks)
10. Dividing Fractions (2 weeks)

All units have  
printable  
AND digital  
versions

## ***Here are the skills covered in each unit:***

**Equivalent Fractions:** used models, fraction bars, and number lines to identify and create equivalent fractions

**Greatest Common Factor:** factor trees, outside in charts, listing multiples, and finding prime numbers

**Least Common Denominator:** finding multiples and rewriting fractions using new denominators

**Adding Fractions:** The first unit uses pictures and models to add fractions with the same denominator. The next unit uses numbers to find the least common denominator, find the greatest common factor, add two fractions with and without common denominators, and simplify proper and improper fractions

**Subtracting Fractions:** The first unit uses pictures and models to subtract fractions with the same denominator. The next unit uses numbers to find the least common denominator, find the greatest common factor, subtract two fractions with and without common denominators, and simplify proper and improper fractions.

**Multiplying Fractions:** changing whole and mixed numbers into fractions, multiplying two fractions, simplifying proper and improper fractions

**Dividing Fractions:** changing whole and mixed numbers into fractions, dividing two fractions using the KEEP, CHANGE, FLIP method, multiplying fractions, simplifying proper and improper fractions

All the units are structured similarly so students become familiar with the type of activities and can concentrate more on the content. Each unit includes all or most of the following:

- Detailed lesson plans
- A book PLUS a pre-recorded PowerPoint show and movie version
- Vocabulary board
- Power cards
- Group activities
- Matching and sorting activities
- Various practice worksheets
- Quiz
- Digital activities

All units have  
printable  
AND digital  
versions

## Lesson plan

Every unit has a detailed lesson plan with suggestions, a quick look, and a daily step-by-step guide.

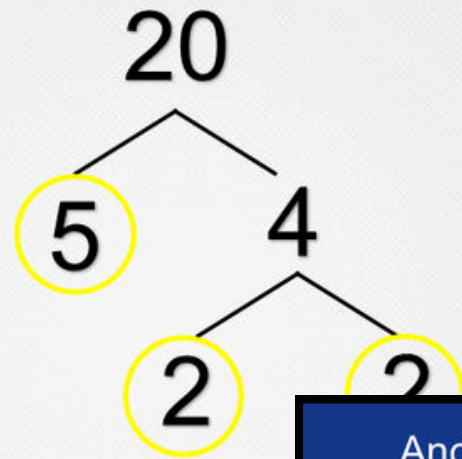

### Day 4-5

Activity	Notes	Materials
Read or listen to the movie version of the book	<ul style="list-style-type: none"><li>• Read through the story, asking lots of questions</li><li>• Continue to make connections between book and vocabulary board</li></ul>	<ul style="list-style-type: none"><li>• Book</li><li>• Vocabulary board</li></ul>
Power card (5 minutes)	<ul style="list-style-type: none"><li>• Review the power cards.</li><li>• I find doing this as part of the daily lesson really helps reinforce the steps students will be completing in this unit</li></ul>	<ul style="list-style-type: none"><li>• Power cards</li></ul>
Group activity (10 minutes)	<ul style="list-style-type: none"><li>• As a group do 2-3 problems coloring in the large grids provided.</li></ul>	<ul style="list-style-type: none"><li>• Fraction cards</li><li>• Fraction grids</li><li>• Dry erase markers</li></ul>
Worksheet review (5 minutes)	<ul style="list-style-type: none"><li>• Review the worksheets completed yesterday</li></ul>	<ul style="list-style-type: none"><li>• Multiplying fractions worksheet</li></ul>
Multiplying proper fractions (10 minutes)	<ul style="list-style-type: none"><li>• Students will complete 1-2 of the worksheets where they are multiplying proper fractions that need to be simplified.</li><li>• You may need to go back and review finding the greatest common factor covered in the <a href="#">Adding Fractions Unit</a></li><li>• I would do one problem day 4 and the remaining 2 problems day 5.</li></ul>	Multiplying fractions worksheets (pgs. 74-76)
Sharing (10 minutes)	<ul style="list-style-type: none"><li>• Each student shares one of their finished worksheets with the group using the communication method of their choice</li></ul>	<ul style="list-style-type: none"><li>• Completed worksheets</li><li>• Communication devices</li></ul>

# Books

One method is to do a factor tree. Start with any set of factors for the number. Continue finding factors until you only have prime numbers left.

Another way to find the factors in a number is to fill out a chart working from the outside in using whole number that divide evenly into the starting number.

20

1						20
1	2				10	20
1	2	4		5	10	20

Every unit has a book with simple text and engaging photos or illustrations. It comes in a pdf, recorded PowerPoint show, and an mp4 file.

Christa Joy, Special Needs for Special Kids

Christa Joy, Special Needs for Special Kids

Every unit has a vocabulary board to use while working through the unit. Suggestions for use are included.

Step by step cards for dividing fractions. Made to fit on 4x6 index card.

- Print on cardstock and laminate
- Glue together back-to-back

### Dividing fractions

1. **Keep** the first fraction the same
2. **Change** the sign
3. **Flip** the second fraction
4. Multiply the fractions
5. Simplify if needed

**Example:**  $\frac{1}{4} \div \frac{2}{3}$

- |  |  |
|--|--|
| ① $\frac{1}{4} \div \frac{2}{3} = ?$   | ④ $\frac{1}{4} \times \frac{3}{2} = \frac{3}{8}$ |
| ② $\frac{1}{4} \times \frac{2}{3} = ?$ | ⑤ $\frac{3}{8}$ ✓                                |
| ③ $\frac{1}{4} \times \frac{3}{2} = ?$ |  |

# Power Cards

Step by step cards for simplifying a mixed number. Made to fit on 4x6 index card.

- Print on cardstock and laminate
- Glue together back-to-back

### Simplify an Improper Fraction

1. Divide the numerator by the denominator.
2. Write down the largest whole number you get.
3. Place the remainder in the numerator.
4. Keep the denominator the same

**Example:**  $\frac{9}{5}$

- |                     |   |                   |
|---------------------|---|-------------------|
| ① $5 \overline{)9}$ | → | ② 1               |
| $5 \overline{)9}$   | → | ④ $1 \frac{4}{5}$ |
| ③ $\frac{4}{5}$     |   |                   |

Step by step cards for turning a mixed number into an improper fraction. Made to fit on 4x6 index card.

- Print on cardstock and laminate
- Glue together back-to-back

### Mixed number >> improper fraction

1. Multiply the whole number and denominator.
2. Add the numerator.
3. New numerator is answer. Keep denominator the same

**Example:**  $3 \frac{2}{5}$

- |                     |
|---------------------|
| ① $3 \times 5 = 15$ |
| ② $15 + 2 = 17$     |
| ③ $\frac{17}{5}$    |

Each unit comes with power cards to review the steps from that unit. Students can use these cards as a quick reference when solving problems throughout all the units.

All units have group activities to help with generalization and real-world examples of the skills covered in that unit.

**Greatest Common Factor:** Find 10 group activities

**Least Common Denominator:** 5 different activities plus prime number bingo game

**Adding & Subtracting Fractions:** work through problems using fraction cards and templates

**Multiplying Fractions:** Drawing out equations

**Dividing Fractions:** Bean Party

- Solve the problem by adding the numerators.
- Circle yes or no for each question..

$$\frac{2}{3} + \frac{4}{3} = \square$$

Proper fraction?  yes  no

Needs to be simplified?  yes  no

$$\frac{2}{6} + \frac{3}{6} = \square$$

Proper fraction?  yes  no

Needs to be simplified?  yes  no

- List out the multiples for each denominator.
- Circle the **least** common denominator in each set of multiples.

$$\frac{2}{3}$$

- 3 x 1 = \_\_\_
- 3 x 2 = \_\_\_
- 3 x 3 = \_\_\_
- 3 x 4 = \_\_\_
- 3 x 5 = \_\_\_

$$\frac{1}{2}$$

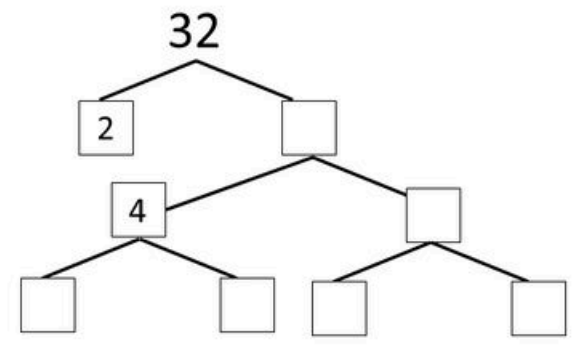

- 2 x 1 = \_\_\_
- 2 x 2 = \_\_\_
- 2 x 3 = \_\_\_
- 2 x 4 = \_\_\_
- 2 x 5 = \_\_\_

$$\frac{5}{8} + \frac{6}{8} = \square$$

$$\frac{1}{2} + \frac{1}{2} = \square$$

Name:

- Fill out the factor trees (either write in numbers or paste in numbers provided.)
- Circle the prime numbers

$$\frac{1}{6}$$

- 6 x 1 = \_\_\_
- 6 x 2 = \_\_\_
- 6 x 3 = \_\_\_
- 6 x 4 = \_\_\_
- 6 x 5 = \_\_\_

- Rewrite the equation using the keep, switch flip method.
- Solve equation.
- Simplify if needed.

$$\frac{1}{3} \div \frac{6}{5} = ?$$

1 & 2  $\frac{\square}{\square} = \square$

3 Simplify if needed.

$$\frac{2}{5} \div \frac{5}{3} = ?$$

1 & 2  $\frac{\square}{\square} = \square$

3 Simplify if needed.

There are lots of worksheets in each unit for students to practice the individual steps needed for that skill as well as working through the entire problem.

4

$\frac{1}{4}$

1. Rewrite the equation using the keep, switch flip method.
2. Solve equation.
3. Simplify if needed.

$$\frac{5}{3} \div \frac{3}{2} = ?$$

1 & 2

$$\frac{\boxed{\phantom{000}}}{\boxed{\phantom{000}}} = \boxed{\phantom{000}}$$

3 Simplify if needed.

4

1. Find the common denominator.
2. Add the numerators (keep denominator the same).
3. Simplify if needed

$$\frac{2}{3} + \frac{1}{6} = ?$$

1

- |             |             |
|-------------|-------------|
| 3 x 1 = ___ | 6 x 1 = ___ |
| 3 x 2 = ___ | 6 x 2 = ___ |
| 3 x 3 = ___ | 6 x 3 = ___ |
| 3 x 4 = ___ | 6 x 4 = ___ |
| 3 x 5 = ___ | 6 x 5 = ___ |

Least common denominator =

2

Write new equation and add fractions.

$$\boxed{\phantom{0}} + \boxed{\phantom{0}} = \boxed{\phantom{00}}$$

$$\boxed{\phantom{0}} + \boxed{\phantom{0}} = \boxed{\phantom{00}}$$

3

Simplify if needed.

Problems are spaced out and there is color-coding and other visual structure present to support students as they work through each step.

Name: \_\_\_\_\_

# Quiz

1. In order to divide fractions, what needs to be the same?

2. What do you keep the same when dividing fractions?

3. What do you change the ÷ to when dividing fractions?

4. What do you flip when dividing fractions?

5. True or False. You do not need to check and simplify your answer if needed when dividing fractions.

Worldwide. Used with permission. Boardmaker® is a trademark of Tobii Dynavox.

# Quiz

6. Think back to our jellybean party from the book. If you had 6 cups of jellybeans, how many kids could you invite if you gave each kid 2 cups of jellybeans?

7. What could you decrease in order to invite **more** kids to the party?

8. With you 6 cups of jellybeans, how many kids could you invite if you gave each kid 1/2 cup of jellybeans?

9. Solve this equation (show your work):  $\frac{1}{3} \div \frac{6}{5} = ?$

Finally, each unit has a quiz that covers the concepts in the book and sample problems.

All of these units include digital versions of the activities. Two sets of slides are included. One requires students to type in their answers. The other set has color coding for more support, and students click and drag the answers to fill in boxes without having to type anything.

There is a movie version of the book.

These make great independent learning centers.

**Make great independent learning centers.**

Watch the movie on finding the common denominator

1

# Finding a Common Denominator

The movie version of the book from the unit is narrated and animated. It walks through solving the equations step by step.

by  
Christa Joy

$$\frac{1}{3} - \frac{1}{6} = ?$$

- 1
- |         |                      |         |                      |
|---------|----------------------|---------|----------------------|
| 3 x 1 = | <input type="text"/> | 6 x 1 = | <input type="text"/> |
| 3 x 2 = | <input type="text"/> | 6 x 2 = | <input type="text"/> |
| 3 x 3 = | <input type="text"/> | 6 x 3 = | <input type="text"/> |
| 3 x 4 = | <input type="text"/> | 6 x 4 = | <input type="text"/> |
| 3 x 5 = | <input type="text"/> | 6 x 5 = | <input type="text"/> |

Least common denominator =

2 Write new equation and add fractions.

<input type="text"/>	-	<input type="text"/>	=	?
<input type="text"/>	-	<input type="text"/>	=	<input type="text"/>

3 Simplify if needed.

final answer

<input type="text"/>
<input type="text"/>

1. Find the common denominator.
2. Subtract the numerators (keep denominator the same).
3. Simplify if needed

One set of slides requires students to type in their answers.

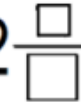

Example:

Color in the designated area in each picture. Use a different color for each fraction. For the final answer, use those same colors and circle the area that overlaps and type your answer. Do NOT simplify your answer.

Great for review

 proper fractions	 improper fractions	 mixed fractions

Sort the fractions into the correct column. If you are not sure, place it on the middle line.

$\frac{6}{7}$	$\frac{8}{3}$	$\frac{7}{2}$	$\frac{3}{4}$
$2\frac{1}{2}$	$3\frac{4}{5}$	$\frac{6}{12}$	$\frac{5}{2}$
$\frac{9}{7}$	$1\frac{7}{8}$	$\frac{3}{5}$	$1\frac{3}{4}$
$3\frac{3}{6}$	$\frac{3}{2}$	$\frac{11}{-}$	$\frac{6}{-}$
$\frac{7}{10}$	$4\frac{1}{5}$

Perfect for any learning level

One set of slides is color coded and students click and drag their answers.

$\frac{1}{2} + \frac{1}{6} = ?$

1. Find the common denominator.

$\frac{2}{2} \times \frac{1}{2} = \frac{2}{4}$	$\frac{6}{6} \times \frac{1}{6} = \frac{6}{6}$
$\frac{2}{2} \times \frac{3}{2} = \frac{6}{4}$	$\frac{6}{6} \times \frac{1}{2} = \frac{12}{12}$
$\frac{2}{2} \times 3 = \frac{6}{2}$	$\frac{6}{6} \times 3 = \frac{18}{6}$
$\frac{2}{2} \times 4 = \frac{8}{2}$	$\frac{6}{6} \times 4 = \frac{24}{6}$
$\frac{2}{2} \times 5 = \frac{10}{2}$	$\frac{6}{6} \times 5 = \frac{30}{6}$

Least common denominator =

2. Write new equation and add fractions.

+  =

3. Simplify if needed.

Factors of numerators:

Factors of Denominators:

greatest common factor =

Final answer =  ÷  =

1. Find the common denominator.  
2. Add the numerators (keep denominator the same).  
3. Simplify if needed
