

INTEGUMENTARY SYSTEM

INCLUDES GOOGLE SLIDES

Special Needs for Special Kids

For students who:

- *are emerging or non-readers*
- *take alternate assessments*
- *are in special education*
- *short-attention span*
- *lack pre-requisite skills*
- *benefit from the use of pictures for support*
- *middle/high school*

Integumentary System Unit

Table of Contents

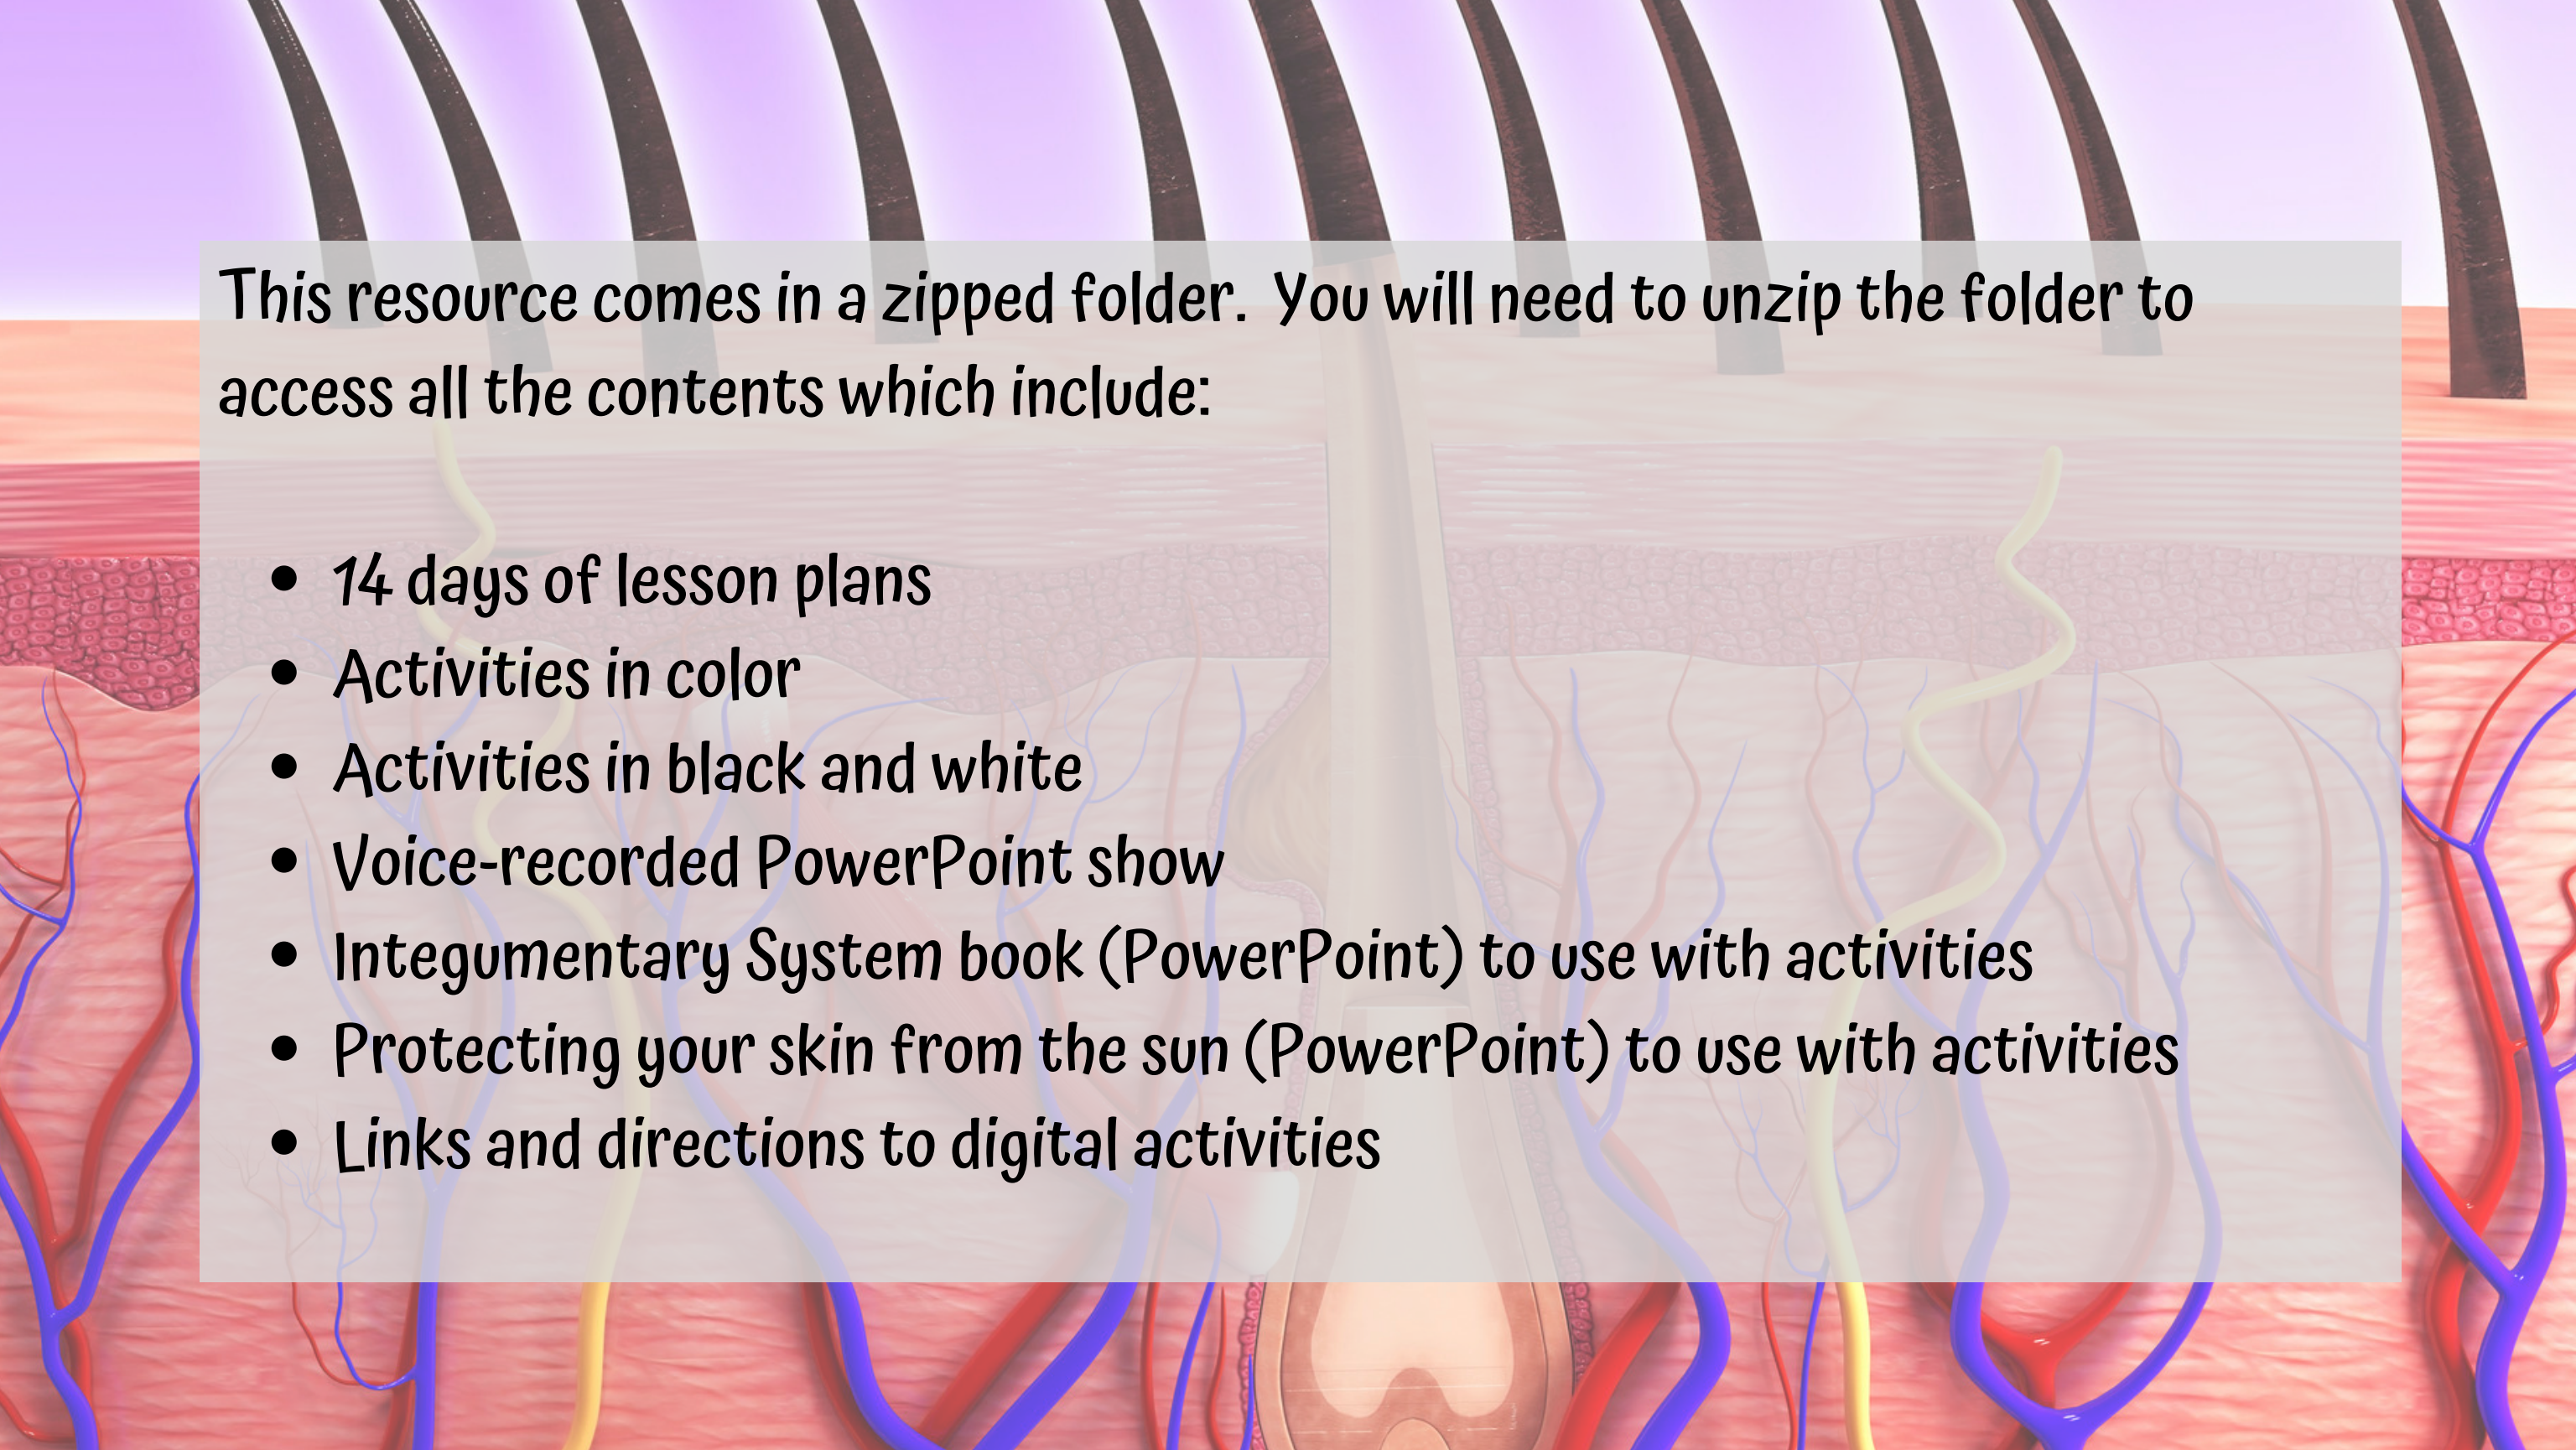

Pages	Activity
4-5	Vocabulary board
6-9	Vocabulary cards
10-18	Vocabulary cut and paste
19-22	Circle map
23-26	Labeling the layers
27-30	Sorting characteristics
31-37	Vocabulary Sudoku
38-39	Vocabulary Word search
40-44	Cloze worksheets
45-55	Assessment
56-59	Ways to protect your skin circle map
60-61	Terms of Use

Also included in this resource as separate files:

- Lesson plans
- Links and directions to digital activities
- PowerPoints **(these are the books in the lesson plans)**
- Voice recorded PowerPoint
- Activities in black and white

This unit contains **14 days** of material. But, don't worry!! I have included a lesson plan to help you make the most of everything packed in this unit.

This unit comes in 2 separate files, one in color and one in black and white.

An anatomical illustration of human skin layers and underlying structures. The top layer shows the epidermis with hair follicles and sweat glands. Below it is the dermis, containing a network of red and blue blood vessels and yellow nerves. The bottom layer is the hypodermis, showing adipose tissue. The background is a light purple gradient.

This resource comes in a zipped folder. You will need to unzip the folder to access all the contents which include:

- ***14 days of lesson plans***
- ***Activities in color***
- ***Activities in black and white***
- ***Voice-recorded PowerPoint show***
- ***Integumentary System book (PowerPoint) to use with activities***
- ***Protecting your skin from the sun (PowerPoint) to use with activities***
- ***Links and directions to digital activities***

Day 1

Activity	Notes	Materials
Read or listen to a recording of the book (15 minutes)	<ul style="list-style-type: none">• Since this is the <u>first time</u> students are seeing the book, I focus a lot on the pictures<ul style="list-style-type: none">◦ Ask lots of questions about what they might think the pictures mean or may relate to• Make connections between book and vocabulary board (have students find relevant symbols on their boards to go with a concept or photo on page.)• Go through the book twice, once just looking at the photos and a second time reading the story	<ul style="list-style-type: none">• Book• Vocabulary board
Vocabulary cards (5 minutes)	<ul style="list-style-type: none">• This first day, I am just introducing and allowing the students to explore/look at the cards• Make connections between cards and vocabulary board (have students matching symbols on the board)	<ul style="list-style-type: none">• Vocabulary cards• Vocabulary board
Circle Map (10 minutes)	<ul style="list-style-type: none">• Do the circle map that is a general review• Choose the best version (errorless or not) depending on the learning level of your students• Students cut out symbols and place in circle map• Make connections to the book as necessary	<ul style="list-style-type: none">• Circle map• Scissors• Glue
Sharing (10 minutes)	<ul style="list-style-type: none">• Each student shares their circle map with the group using the communication method of their choice• This repetition is so important. Students are hearing the relevant vocabulary when:<ul style="list-style-type: none">◦ Read the story◦ Review the vocabulary cards and board◦ Complete the circle map◦ Share the circle map	<ul style="list-style-type: none">• Completed circle maps• Communication devices

There is a detailed lesson plan with:

- suggestions
- overview
- daily step-by-step guide

Certain parts of your body have more receptor cells than others. Your hands, feet, and lips have the highest number of these special cells.

This unit contains a 34 page book with simple text on the Integumentary System.

It comes in a PowerPoint version as well as a voice-recorded PowerPoint (so you don't have to print it out.) There is also a movie version you can use in google slides.

Just make sure you wear sunscreen to protect your skin from the harmful radiation from the sun.

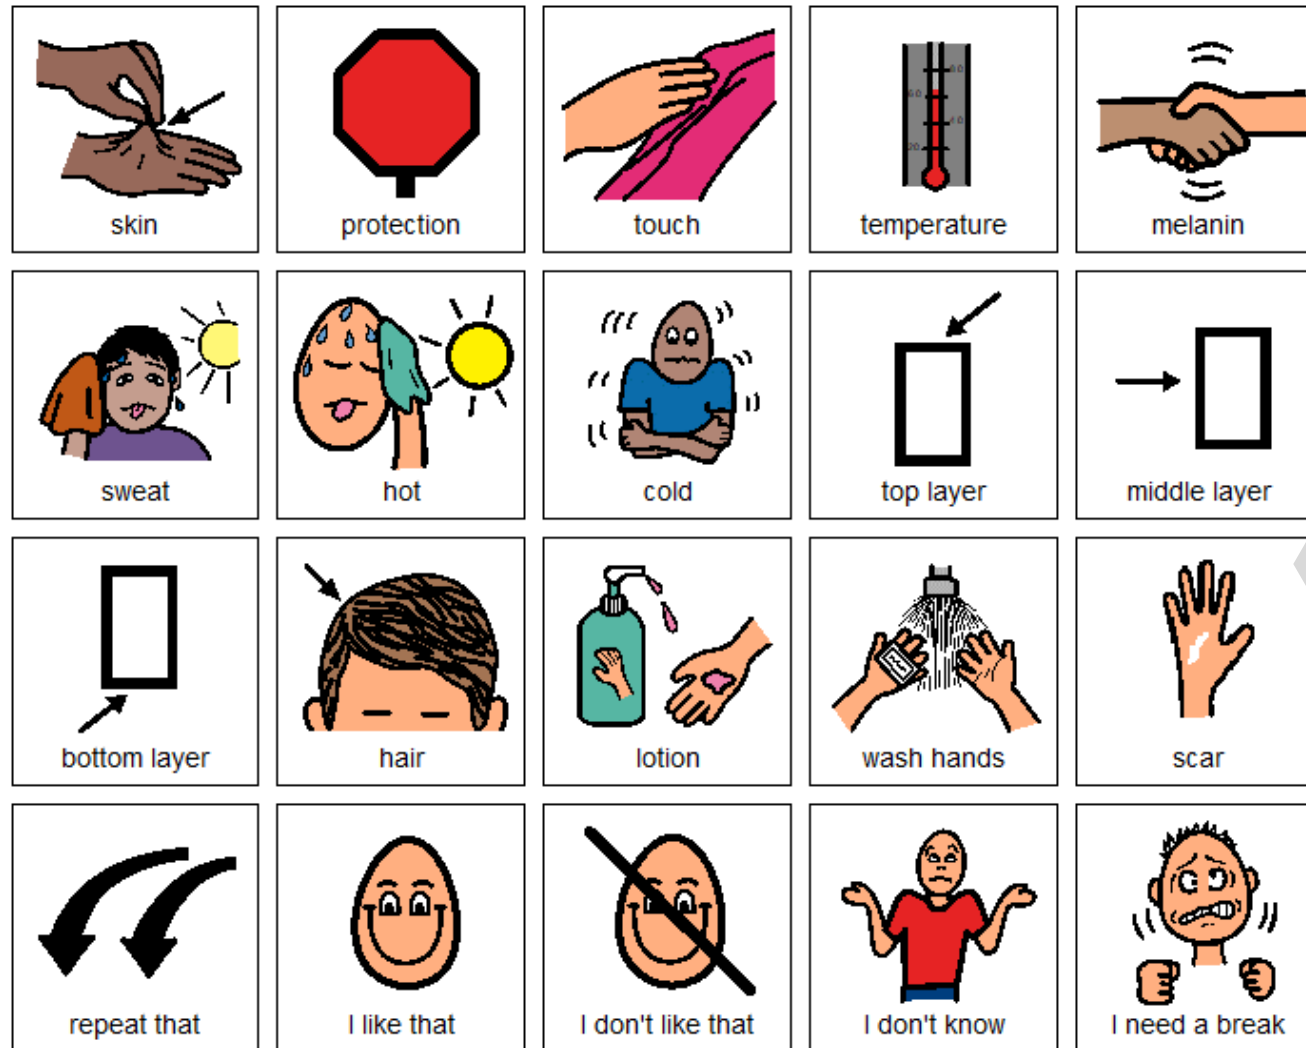

This unit contains a 17 page book with simple text on Protecting Your Skin From the Sun.

It comes in a PowerPoint version as well as a voice-recorded PowerPoint (so you don't have to print it out.) There is also a movie version you can use in google slides.

This unit comes with a vocabulary board.

Vocabulary boards are great for ALL students to assist with participation and engagement in group discussions.

Tips on how to use in the unit!!

integumentary

Relating to the skin.

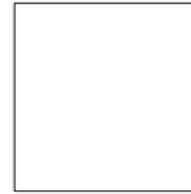

melanin

Pigment created in the outer layer of the skin that gives it its color.

dilate

Blood vessels get bigger when hot to release extra heat.

epidermis

Outer most layer of skin

organ

Group of tissues with the same function.

receptor cells

Cells involved in sense of touch. Send signals from skin to brain.

dermis

Middle layer of skin.

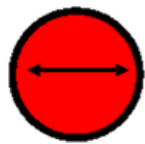

h
Bottom

This unit comes with vocabulary cards.

Every day students will do a group activity using these cards to get more familiar with words that are likely new to them.

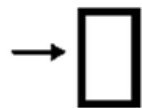

dilate

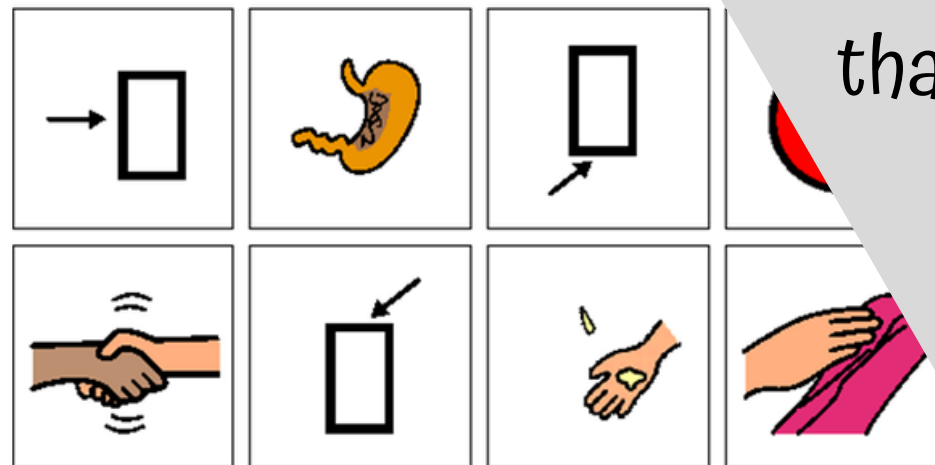

epidermis

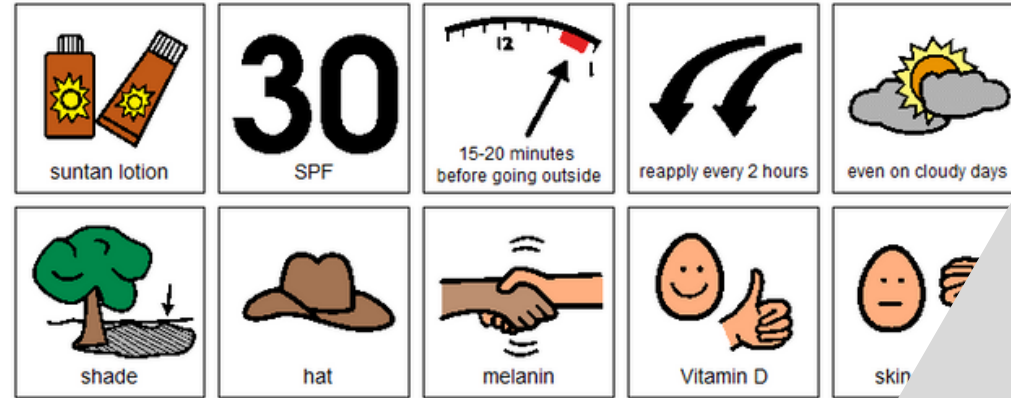

dermis

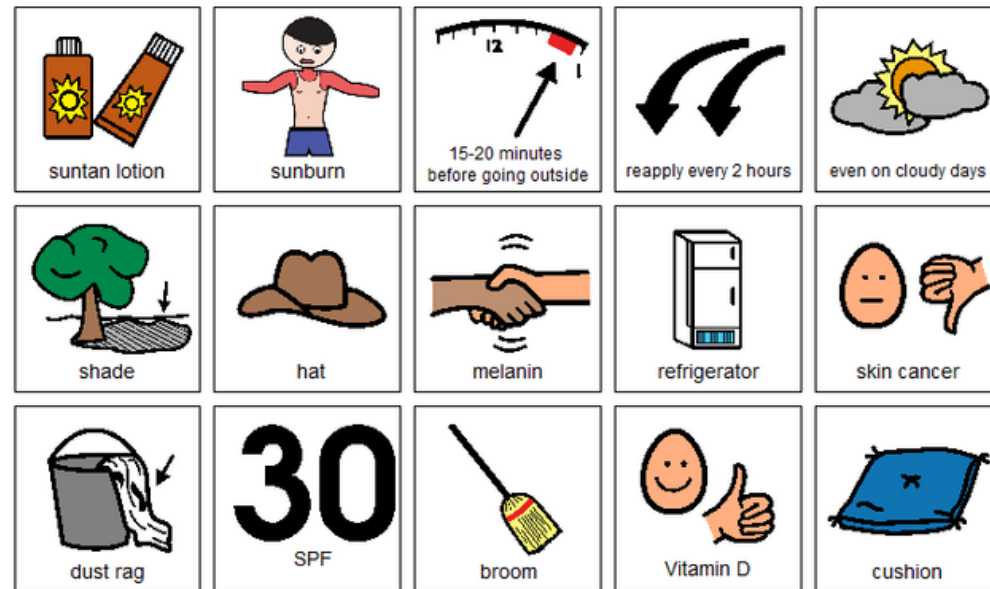

hypodermis

Cut apart pictures and place in circle map about protecting the skin from the sun.

Cut apart pictures and place in circle map **ONLY IF** they are about protecting the skin from the sun.

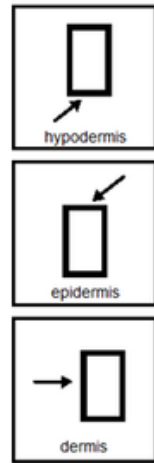

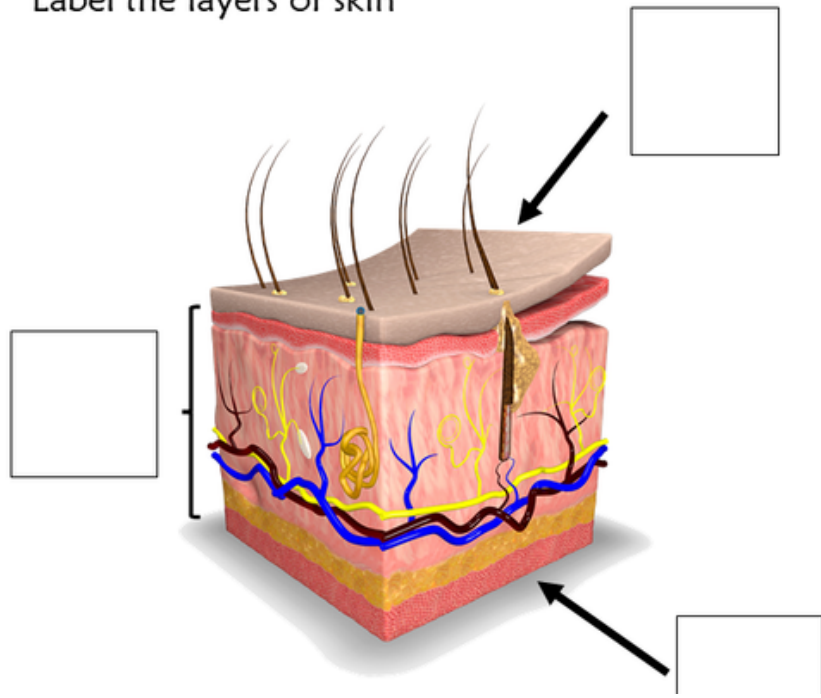

There is a circle map in this unit.

This circle map is a great way for students to see a the concept at a glance. There are 2 versions:

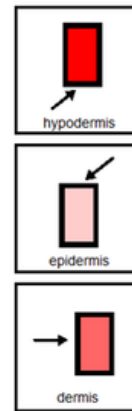

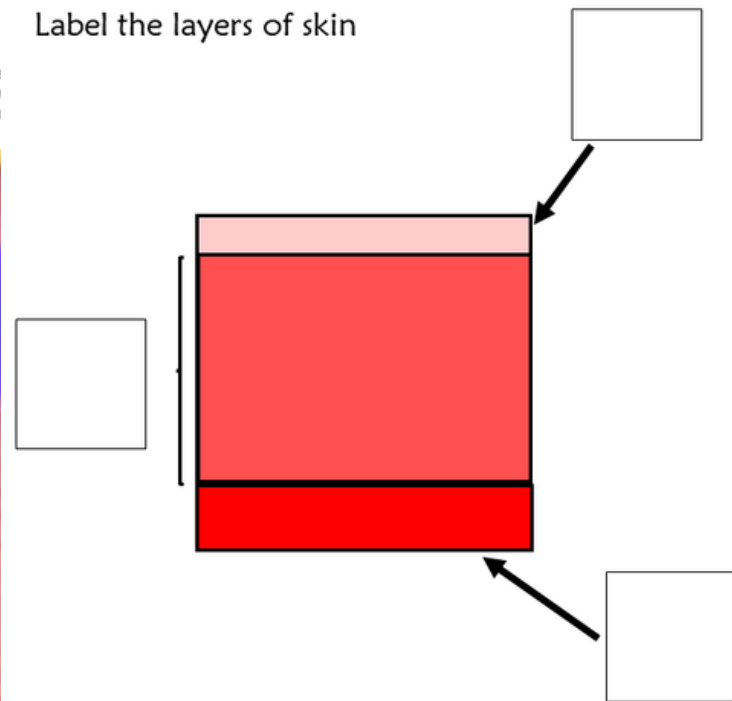

- One is errorless
- One has wrong answers mixed in students will have to set aside

Label the layers of skin

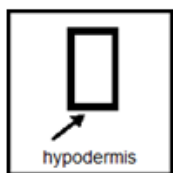

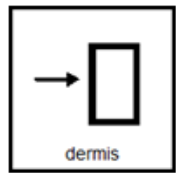

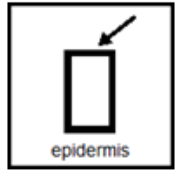

Label the layers of skin

There is a labeling activity. There are 2 versions.

<p>hair follicles</p>	<p>sebum</p>	<p>constantly replaced</p>	<p>bottom layer</p>	<p>melanin</p>
<p>protects</p>	<p>thick</p>	<p>scar</p>	<p>touch receptors</p>	
<p>connects to muscle</p>	<p>sweat glands</p>	<p>connects to bone</p>	<p>thin</p>	

There is a sorting activity, looking at the characteristics of the three layers.

Skin

 epidermis	 sebum			 sweat	 receptor cells
			 epidermis	 integumentary	
 sweat		 sebum	 receptor cells	 epidermis	 melanin
 receptor cells	 melanin				 integumentary
				 receptor cells	 epidermis
 integumentary				 melanin	

Skin

		 sebum	 receptor cells
 receptor cells			
 sebum	 receptor cells	 integumentary	 sweat
	 sweat	 receptor cells	

Place the following images in the empty squares on the previous page, completing the sudoku puzzle.

 integumentary	 integumentary	 integumentary	 receptor cells	 receptor cells	 sweat
 sweat	 sweat	 sweat	 melanin	 melanin	 melanin
 sebum	 sebum	 sebum	 sebum	 epidermis	 epidermis

There is a Sudoku puzzle in this unit as well. This is a great way to work with the new vocabulary!!

There are 2 versions plus answer keys.

Skin

organ	scar	sweat	

There is also a word search to work with vocabulary. If your students cannot do a word search, have them highlight the circle words on the answer key.

Skin

1. The main part of the integumentary system is the

2. Your skin is the

organ in your body.

3. Skin is made up of

layers.

4. The top layer is constantly being

5. Skin protects your body from dirt and

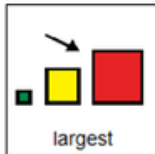

3

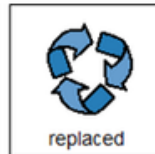

germs

skin

largest

replaced

Skin

6. The skin also helps to control your body

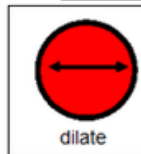

7. Sweating helps to

you body

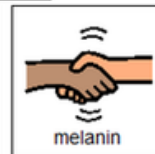

8. When you are too hot, your blood vessels will

9. Touch receptors send messages from your skin to your

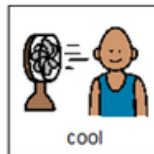

10. is what gives skin its color.

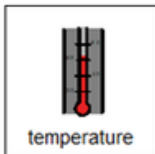

dilate

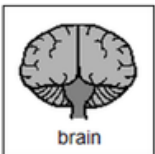

melanin

cool

temperature

brain

Close worksheet are a great informal assessment. This unit has 10 questions that review the integumentary system.

Answer key included.

1. Skin is part of what system?

2. One of the main jobs of the skin is to:

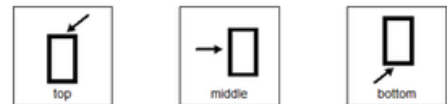

3. What causes people to have different skin color?

4. How many layers of skin are there?

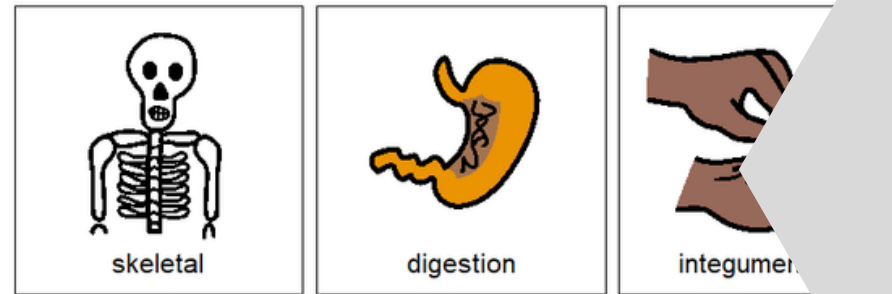

5. The dermis is which layer?

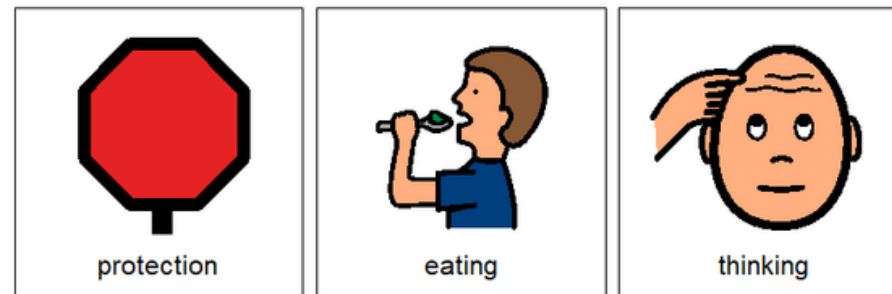

Print onto cardstock or mount on index cards. Cut pictures apart and show student answer choices for each question.

Q 1

Q 2

FINALLY the assessment!!
 There are 3 versions. This version has 10 questions with 3 picture choices for each question.

Answer key included.

- *This unit includes digital versions of the activities. These simply require the student to click and drag the answers. There is no drawing or typing involved.*
- *There are 2 complete sets of slides. One set is differentiated using color.*

Make great independent learning centers.

Watch the
movie on the
Integumentary
System

Your skin is the biggest organ in your
and it is your first defense against th
may be dangerous around you.

*This unit also includes digital
versions of the activities.*

*Students can watch a movie
book version of the book rather
than printing it out.*

Use for more review.

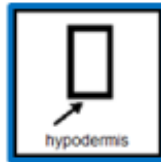

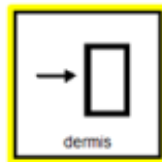

Place the pictures in the circle map about the integumentary system.

 protects	 regulate temperature	 sense of touch	 melanin
 fur	 feathers	 epidermis	
 scar	 sebum	 organ	

Each activity is set up so students can click and drag answers. No typing is required.

Perfect for any learning level.

Place the pictures in the column that describes that layer of the skin.

The second set of slides uses color for differentiation and extra support for students who may need it. Mix and match slides from both sets to make the perfect set for each student.

Save money and get this as part of the Human Anatomy Bundle: Advanced Systems.

Also includes:

- **Integumentary System**
- **Urinary/Reproductive System**
- **Circulatory System**
- **Immune System**
- **5 Senses**
