This unit contains over 50 pages of material. I have included a detailed lesson plan to help you make the most of everything in this unit including how to add some group activities.

This unit comes in 2 files, one in color and one in black and white.

States of Matter Lesson Plan

Preparation

- Print out a vocabulary board for each student to use throughout unit
 - Laminate or place in page protector
- Book
 - Print out, laminate, and bind

Preassessment (do day 1 before starting lesson)

- Choose the form of the assessment that best fits the learning level of your students
- Give the assessment to assess what your students may already know
- I cannot emphasize enough how important this step is. If you want to see growth, this preassessment is so important!!

Teaching Tips

1. *Color Coding*: this is a really easy way to add more structure to a matching activity. Outline or color in an empty box or sorting label. [Outline](#) or color in the corresponding picture symbols the same colors. Becomes a color matching task.
 - a. For more info, read more here: <https://specialneedsforspecialkids.org/2015/09/05/using-color-coding-for-differentiation/>
 - b. I also have a blog post on differentiating one activity 3 ways: <https://specialneedsforspecialkids.org/2018/10/22/differentiating-1-activity-3-ways-easily-and-effectively/>
2. *Make you own copies of the activities*: Every day I review the activity we did yesterday. For that reason:
 - a. I often complete the activity myself and often laminated it for easy review that I could use year after year.
 - b. My copies were also helpful as either a model for students who needed more support or as a way for more advanced students to self-check their work.
3. *Options for Use*: Turn any activity into a reusable file folder activity by laminating and adding Velcro.
 - a. For more info, watch this video here: <https://www.teacherspayteachers.com/Product/Making-File-Folder-Activities-3474240>

There is a book with this unit using simple text and photos. It is 22 pages and is an overview of the properties of liquids.

Both come in pdf versions as well as a voice-recorded powerpoints (so you don't have to print it out.)

Cut apart pictures and place in circle map.

Cut apart pictures and place in circle map **ONLY IF** they are true about liquids.

There is a circle map on the properties and examples of liquids.

Circle maps are a great way for students to see the concept at a glance.

There are 2 versions:

- One is errorless
- One has wrong answers mixed in students will have to set aside

Apple juice is a liquid.
