Everything highlighted in yellow has a digital activity. There is a separate file in this unit with directions and links to access them.

At the end of August I will be updating this unit every year. You can go to My Purchases in TPT to re-download the new version or email me at specialneedsforspecialkids@gmail.com and I will send it to you!!

This unit contains over 40 pages of material PLUS 7 google slides with activities students can do online.

Everything highlighted in yellow comes with a digital version of the activity.

A silhouette of a construction worker in the foreground, pouring material from a shovel. In the background, another worker is visible near a piece of machinery.

But how did Labor day even start or become a holiday in the first place?

Earlier that year, there had been a large number of workers for the railroad in Chicago who refused to go back to work because it was so unsafe.

Because it is a national holiday, most people have the day off from work.

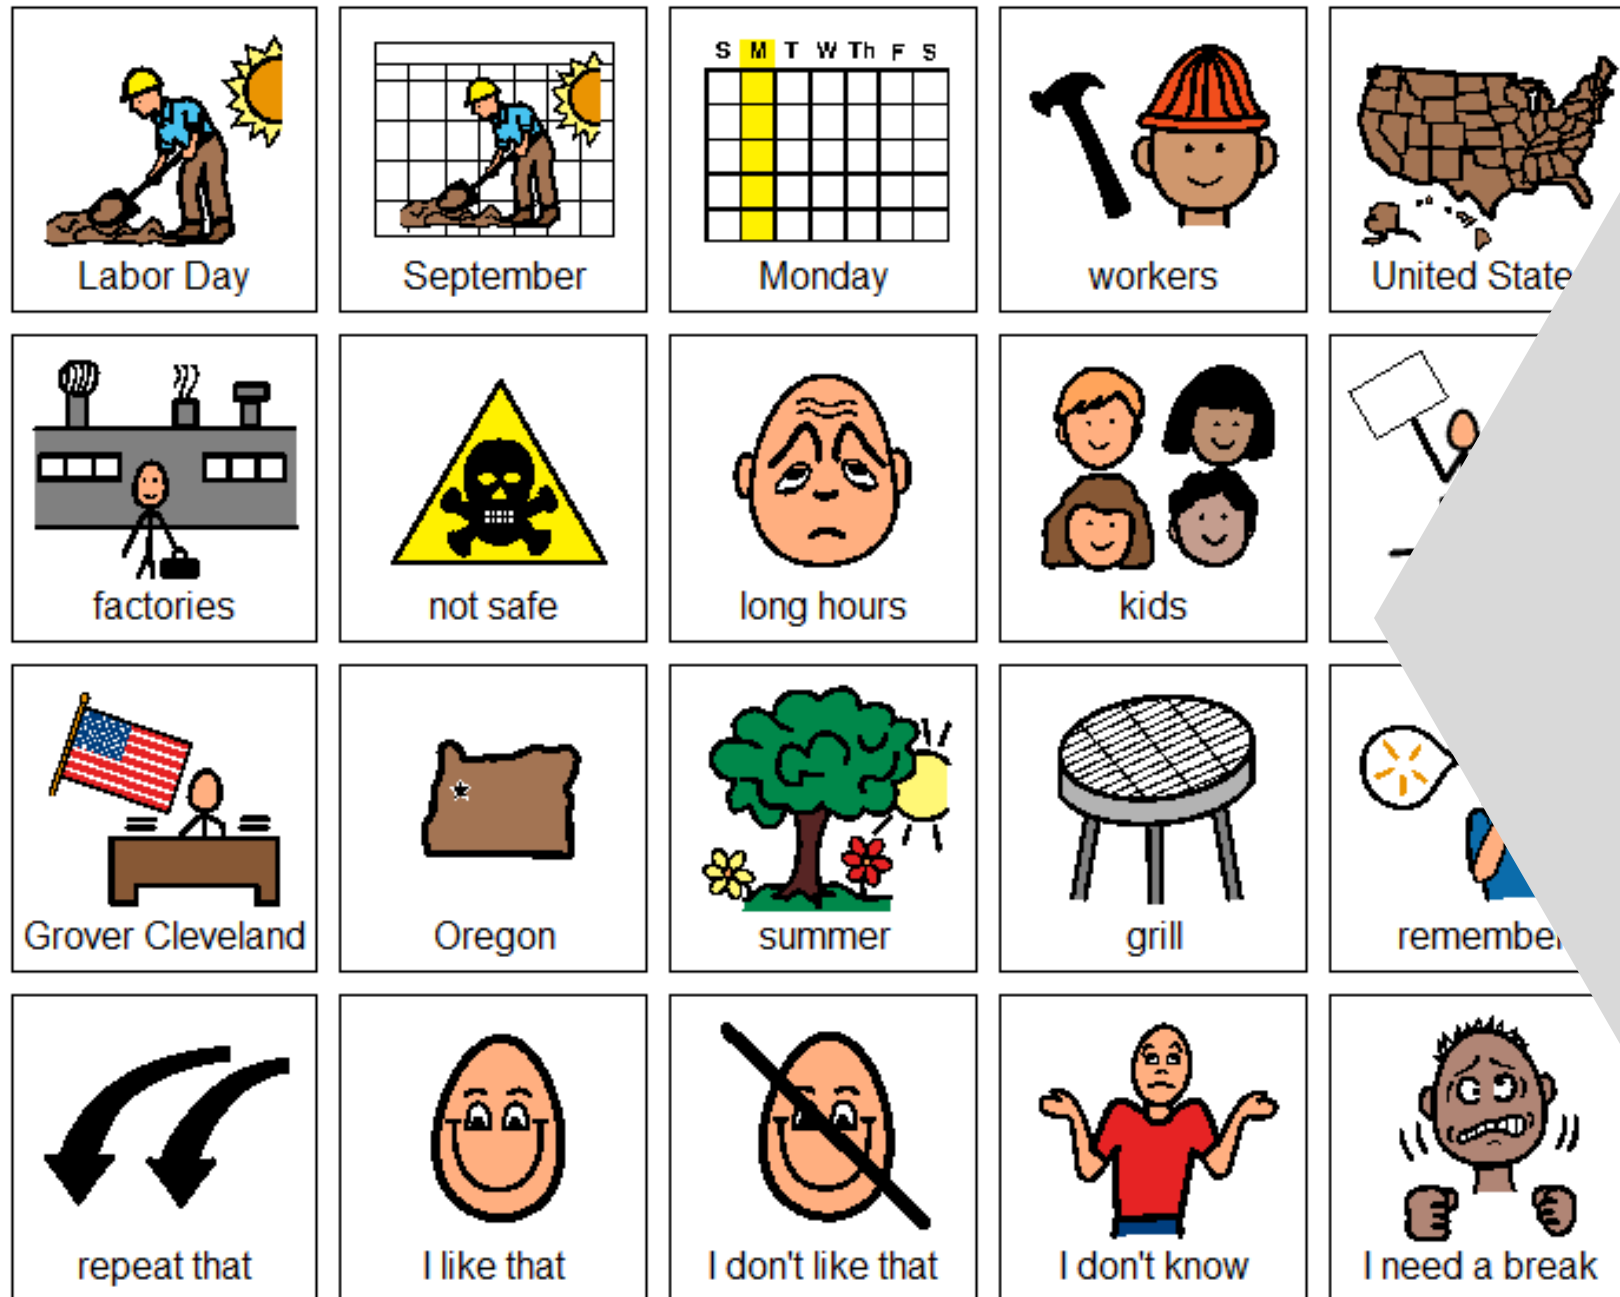

This unit also contains a video version of the book included in the unit. You can assign it in google classroom or use it as is in the digital activities.

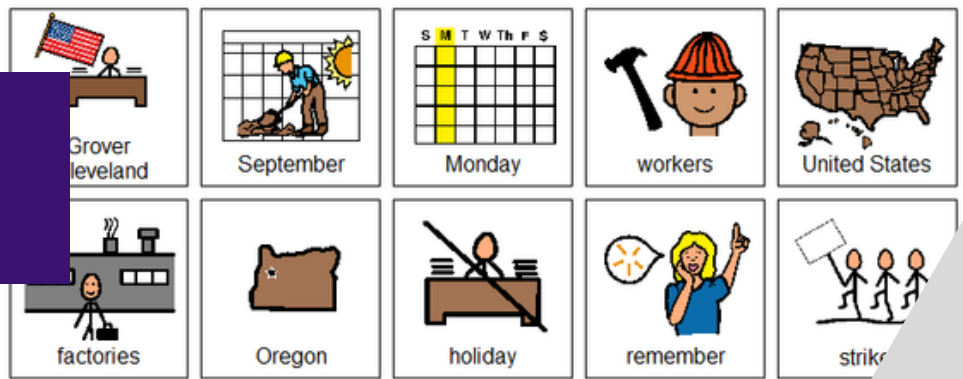

This unit comes with a vocabulary board.

Vocabulary boards are great for ALL students to assist with participation and engagement in group discussions.

Tips on how to use in the unit!!

errorless

contains wrong answers

There is a circle maps in this unit.

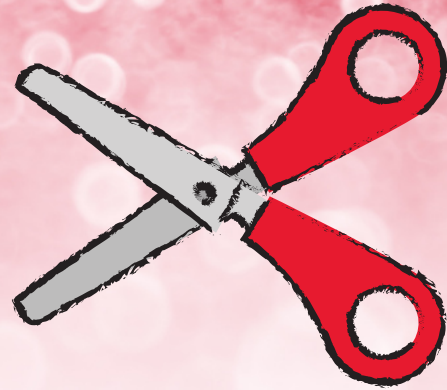

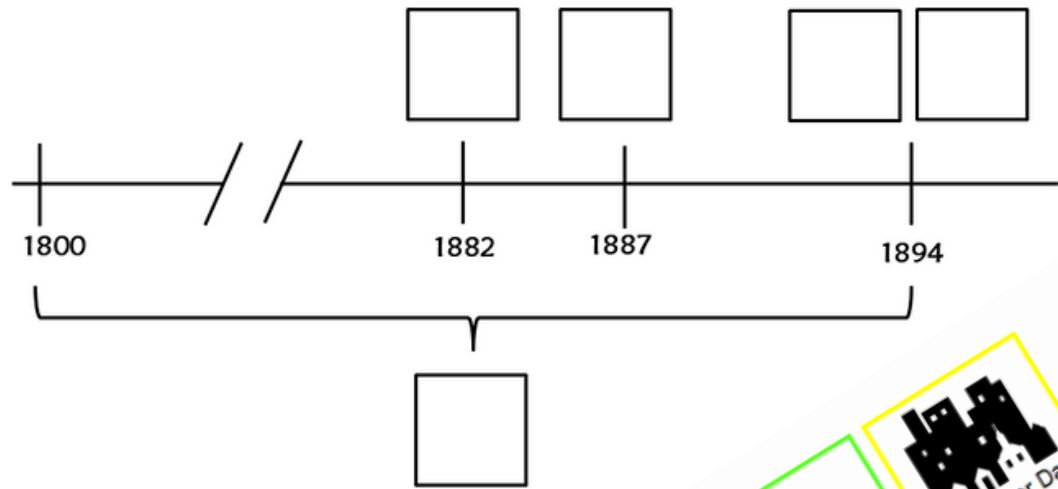

Circle maps are a great way for students to see the big idea.

It comes with an errorless version as well as a version with wrong answers mixed in.

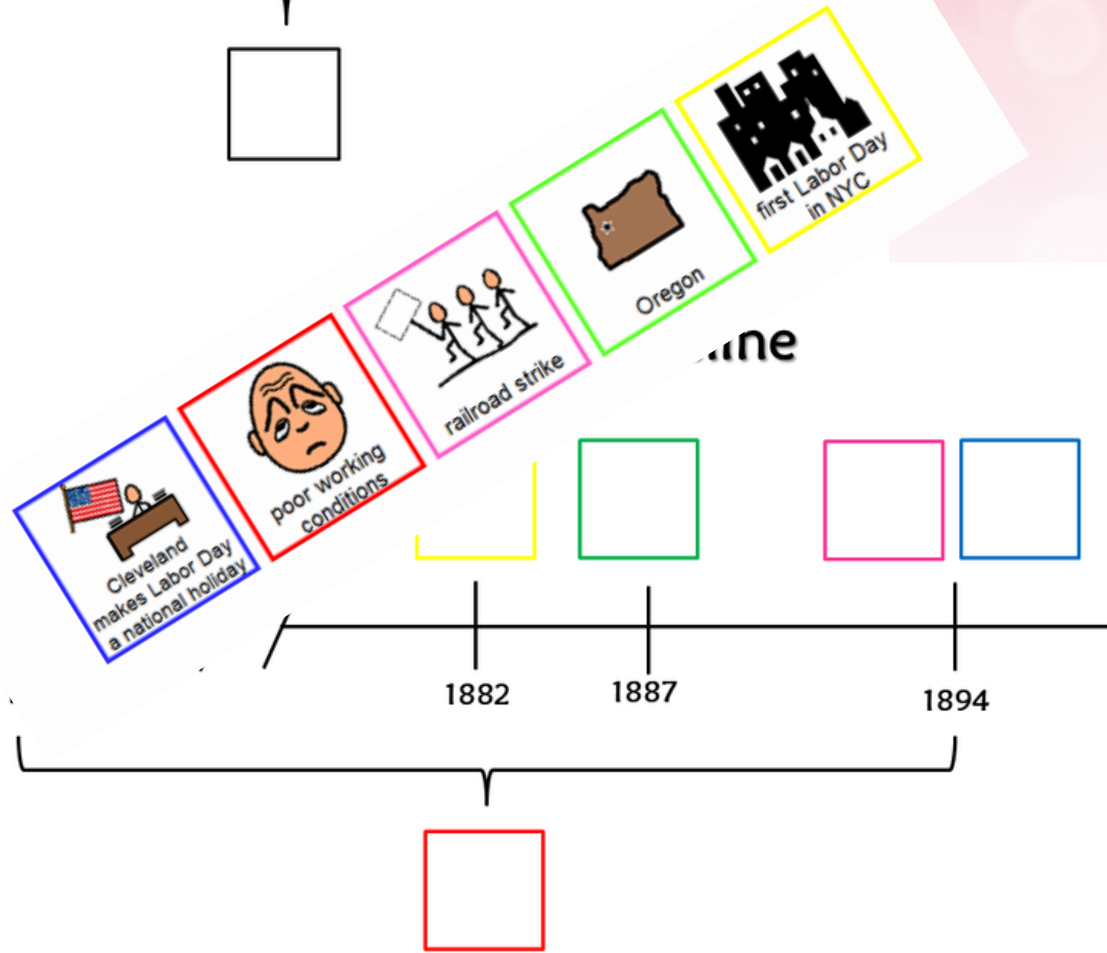

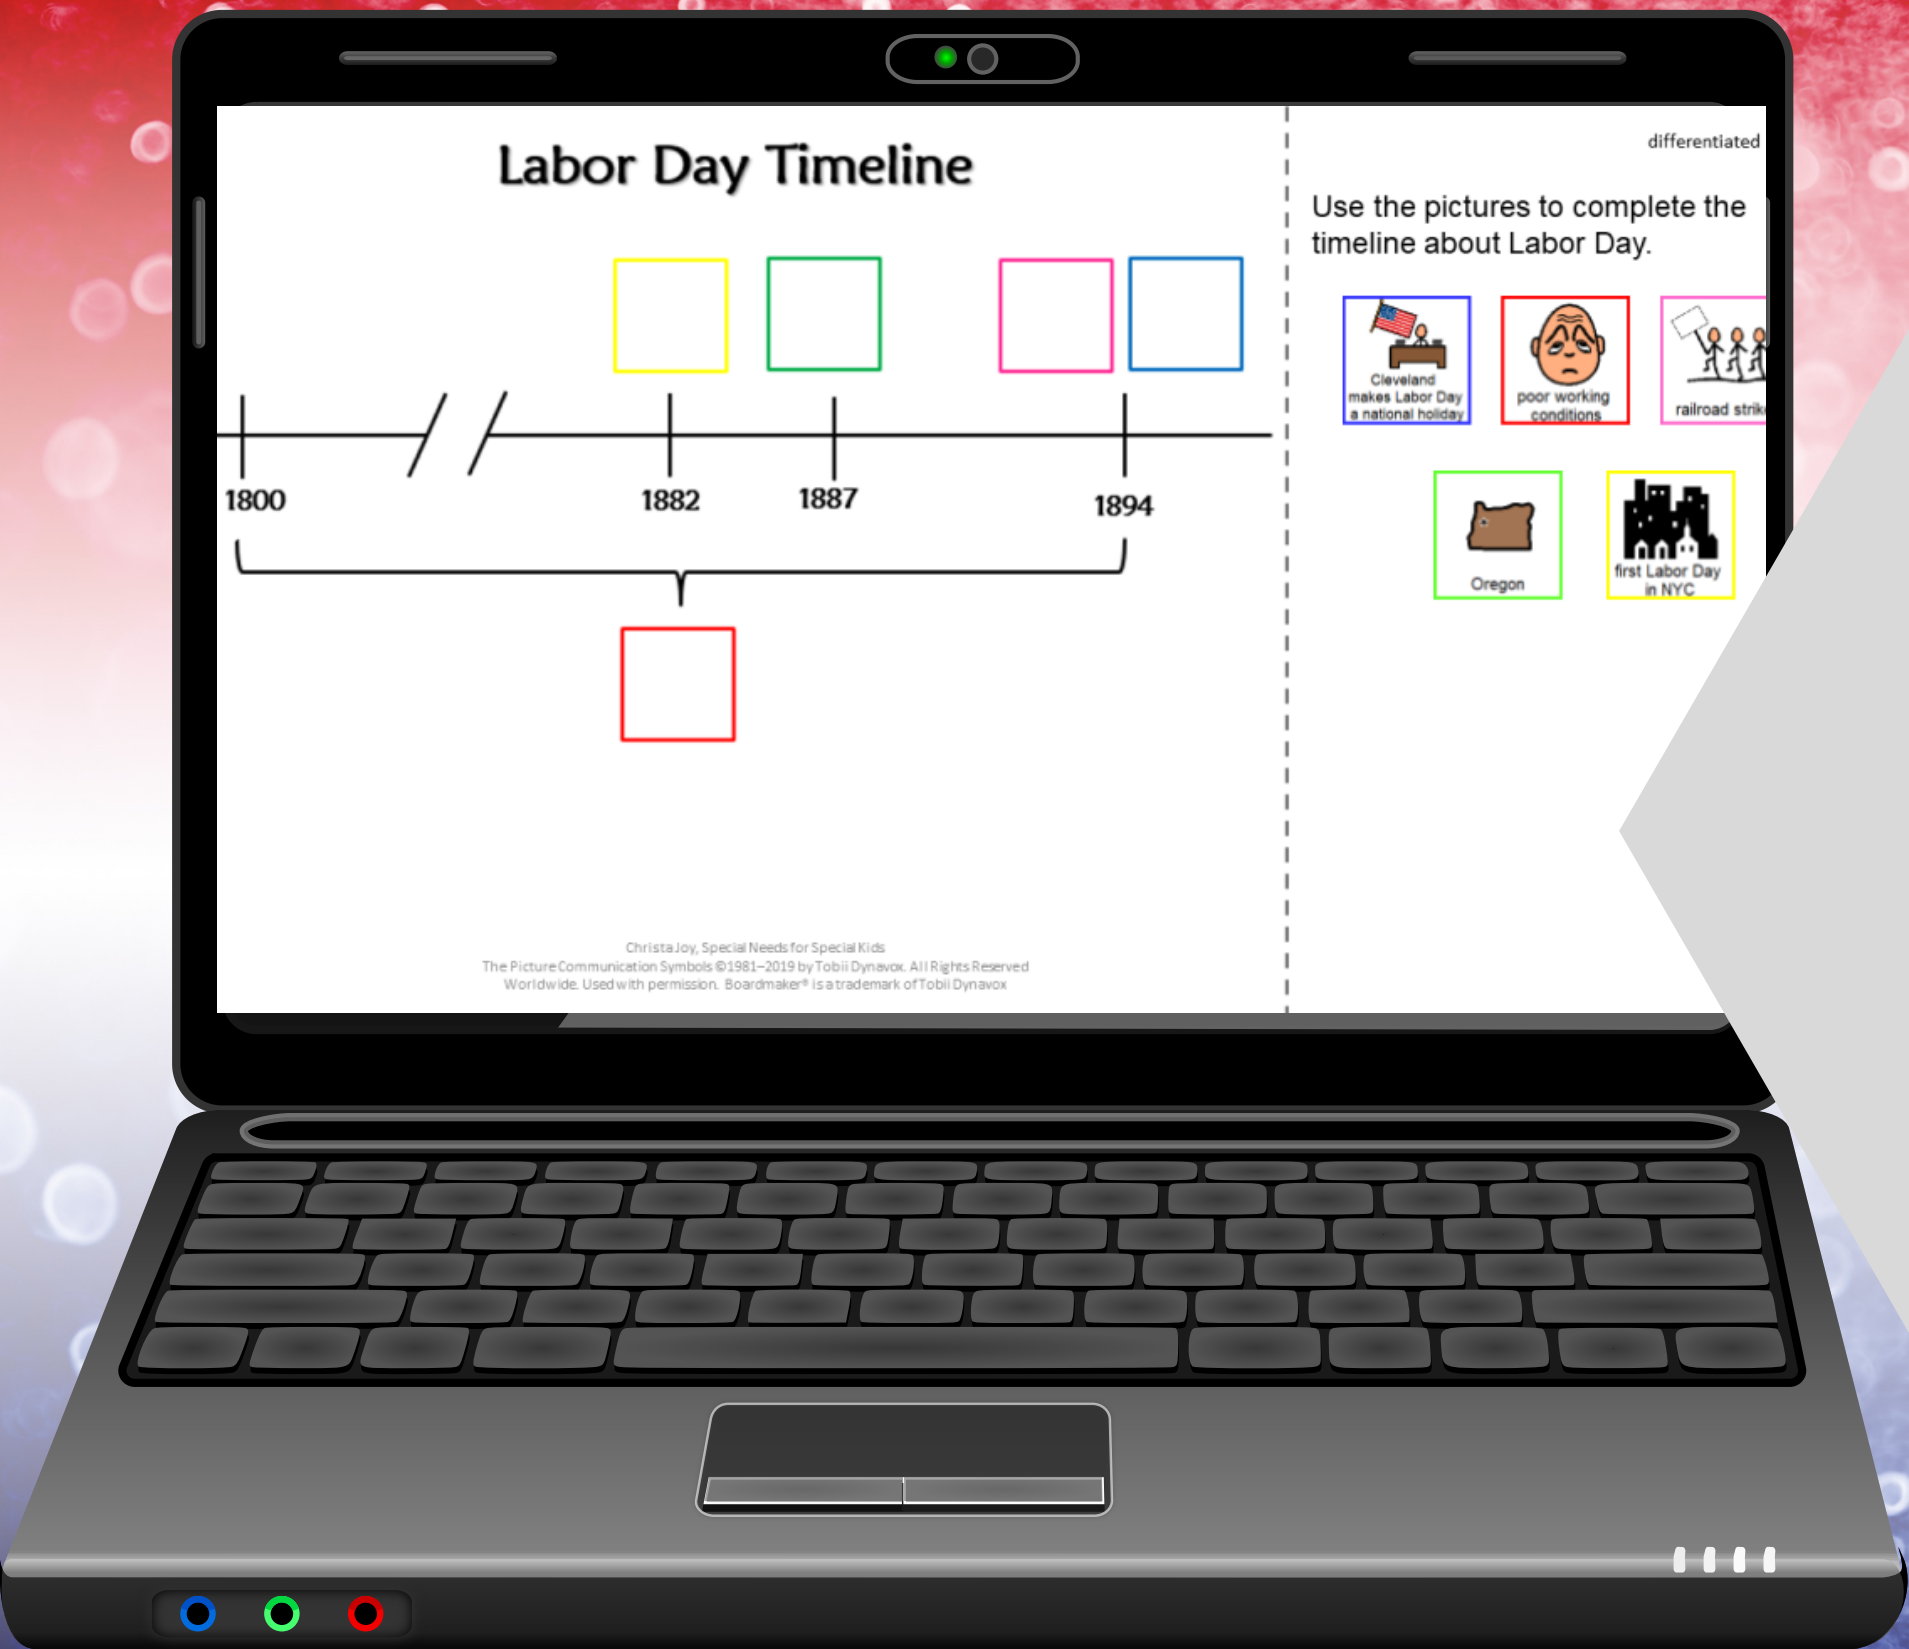

The circle map comes in digital versions. There is one with only corrected answers and one with wrong answers mixed in.

Labor Day Timeline

There is a timeline in this unit. It covers just the big events leading up to President Cleveland declaring Labor Day a national holiday. There is a color coded version included.

The timeline activity is also in a digital version. The regular and color coded options are both provided. Choose the best one for your student.

The calendar activity is also in a digital version. There is also a version that comes with color coding to provide more support.

I realize there will be some students out there unable to do cutting activities. I have a blog post with ways to complete activities without a pair of scissors!!
