outside	old wise beetle	click beetle

Click beetles are really cool.

Click beetles live and hide in the bark of old trees.

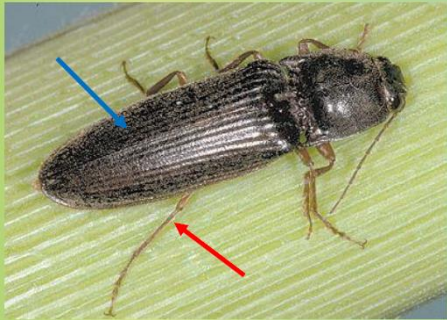

Even presidents get embarrassed.

13 page non-fiction story

Like all beetles, they have 6 legs and 2 wings.

The ability to click not only flips them but it also keeps them safe. The click sound scares away birds and other animals that may want to eat them.

We all make mistakes and have accidents.

The best thing you can do is just try again.
